

The background of the image is a close-up, abstract view of translucent blue fabric or plastic sheeting. The material is draped and folded, creating a complex pattern of sharp, angular shapes and soft, diffused light. The color palette is a monochromatic blue, ranging from deep navy to bright cyan.

amber paris

textiles

Amber Paris designs and creates textured printed surfaces. The work is inspired by industrial Southampton Docks and water, shipping containers have been of particular influence. Reference has also been made to more delicate floral forms especially hydrangeas and their decaying process. Use of colour in the designs is bright and fun whilst also being considered and refined after colours are selected from the initial starting points.

An aim of the designs is to combine references and juxtapose delicate themes and studies with harder edged industrially inspired work. Combinations of themes and ideas are evident in the work where more textural elements, especially tuft, are incorporated into printed surface designs.
